**Gas safety and compliance
insight solution**

How it works

Crowcon Connect gives the visibility and insights you need from your detectors to ensure compliance, improve efficiency and raise levels of safety.

1

Seamlessly record gas safety data

Collect data from every gas detector in your fleet

▶ Link the user to the device, whether a detector has the same user each day, is shared by a team or is part of a pool fleet

▶ Data is automatically gathered and sent to the Crowcon Connect platform whenever a detector is charged

▶ This means no more missing or out of date information. Remove manual data collection processes and improve your operational efficiency

2

Analyse performance and compliance

Crowcon Connect brings together fleetwide information

▶ Crowcon Connect puts all of your detector information into one place regardless of fleet size or location

▶ Instant visibility of exceptions to understand performance and compliance levels across your fleet

▶ Simple to use dashboards and powerful filtering tools deliver valuable insight

3

Take actionable insights and improve efficiency

Ensure compliance and raise safety levels

▶ Crowcon Connect tracks all calibration due dates delivering the detail required for proactive scheduling, reducing downtime

▶ Crowcon Connect provides the records needed to prove fleet compliance as well as identifying areas for improvement

▶ Everything is recorded, making demonstration of compliance during audits easier, saving you time and money

CROWCON CONNECT

Record, Analyse, Act

Gas safety and compliance insight solution

✓ **Off Site**

On Site ✓

Delivering gas safety insight from all employees whether on site or on the move

Charging station Crowcon Connect app

Charging Station Windows PC

Remote users on the move

Pool Fleets

Same user, every day

Off-site employees
The Crowcon Connect app uploads data automatically with no user intervention

On-site employees
Charging stations are conveniently located throughout the facility and automatically upload data to Crowcon Connect

Complete fleet management

Powerful insight tools, complimenting existing practices and procedures

Fleetwide visibility

Data from across the fleet is presented on easy to interpret dashboards. At a glance, users can see fleet utilisation, alarm events and upcoming maintenance requirements. Filters are applied to review information by region, division or team with the ability to fast-track to the detail.

Asset management

Solve your maintenance scheduling issues by using the powerful fleetwide reporting tools to review calibration due dates in advance.

Efficiency levels can be monitored to ensure you have the right number of detectors in your fleet. This is easily done by reviewing detector utilisation on the dashboard.

Link users to their gas detectors

During the initial setup we work with our customers to prepopulate users and detectors. Crowcon Connect makes it simple to link users to their detectors, giving the ability to add and archive users and detectors as changes are required.

This provides the all important link between alarm events and user exposure.

Never miss an alarm

The dashboard highlights recent alarm events, giving users a quick and easy way to access the underlying details.

All alarm events are shown and detailed reports give full visibility of when they occurred and who was operating the device. Automated notifications to line managers ensure alarm events don't go unnoticed. This ensures that the company procedures can be followed.

Real benefits, genuine gains and always moving forward

Crowcon Connect allows customers with portable fleets to improve their **operational efficiency** and **safety compliance** by delivering **actionable insight**.

Unlike competing solutions our product has low implementation cost and integrates with existing processes.

▶ **Secure cloud technology**
Crowcon Connect sits on Microsoft's Azure™ cloud architecture and is compliant with cyber security requirements

▶ **Ultimate flexibility**
Crowcon Connect is developed fully in house by a dedicated team. As a result we have the flexibility to build hierarchies which reflect your business structure, as well as creating custom reports and dashboards

▶ **Fast deployment**
You will be up and running quickly, seeing positive results within weeks

▶ **Always advancing**
Crowcon Connect is always evolving bringing users new and exciting capabilities reflecting changing market requirements

Flexible
Secure
Cost effective
Quick and easy to deploy

About Crowcon Connect

For 50 years, Crowcon have provided solutions that companies worldwide trust and depend on.

With the development of Crowcon Connect, our gas safety and compliance insight solution, we're taking it even further.

Working closely with our customers and leaning on our decades of expertise, we've designed a flexible cloud data solution that helps you get actionable insight from your detector fleet.

Enabling you to reduce costs, improve operational efficiency and raise levels of safety.
